

NCC Pediatrics Continuity Clinic Curriculum: Aeromedical Evacuation History & Principles

Goals & Objectives

- To learn about our military medical aviation history

Pre-Meeting Preparation

- Please view the following video about medical evacuation in Vietnam: <http://www.pbs.org/show/american-medevac>

Conference Logistics

- All residents are going to be having a guided tour at the National Air and Space Museum Annex (The Steven F. Udvar-Hazy Center near Dulles); half on Tuesday 4/24 and half on Thursday 4/26.
- Our tour guide is Mr. Larry McKinley, who was a DUSTOFF Pilot in Vietnam and the Commander of the 986th Medevac Company in Operation Desert Storm. We will be learning about general military aviation and medical evacuation history.
- Everyone needs to be at the preceptor room NLT than 12:15. Not being present on time will be considered missing movement (a big deal in deployment terms). Uniform is the uniform of the day.
- We will not have time for lunch prior to the tour, so plan on bringing our lunch to eat on the bus.
- Movement to the Museum via POV is only authorized by prior arrangement.
- Upon arrival to the Museum, faculty will check-in at the Welcome desk on the right when we enter. Our tour is scheduled from 1330 to 1530. We plan on being back around 1700 to Walter Reed.

Extra-Credit:

- Find out what DUSTOFF stands for.
