High Cholesterol (TLC Diet) Nutrition Therapy

A plan called Therapeutic Lifestyle Changes (TLC) can help people who have high amounts of cholesterol in their blood.

- Following the TLC plan can help reduce the low-density lipoprotein (LDL) cholesterol (also called “bad” cholesterol) in your blood.
- High-density lipoprotein cholesterol (sometimes called “good” cholesterol) helps rid your body of LDL cholesterol.

Keys to TLC

- **Limit saturated fats and trans fats:**
 - Foods high in saturated fats include fatty meat, poultry skin, bacon, sausage, whole milk, cream, and butter.
 - Trans fats are found in stick margarine, shortening, some fried foods, and packaged foods made with hydrogenated oils.
 - Instead of butter or stick margarine, try reduced-fat, whipped, or liquid spreads.
- **Limit the amount of cholesterol that you eat to less than 200 milligrams (mg) per day.**
 - Foods high in cholesterol include egg yolks (one egg yolk has about 212 mg of cholesterol), fatty meat, whole milk, cheese, shrimp, lobster, and crab.
- **Eat more omega-3 fats (heart-healthy fats):**
 - Good choices include salmon, tuna, mackerel, and sardines. Aim to eat fish twice a week.
 - Other foods with omega-3 fats include walnuts and canola and soybean oils.
 - Flaxseed is another source of omega-3 fats. Have it as flaxseed oil or ground flaxseed.
- **Limit the total amount of fat that you eat (including heart-healthy fats) to 25% to 35% of the calories that you eat.** If you should eat 2,000 calories per day, your fat intake can be between 50 grams (g) and 75 g per day.
- **Get 20 g to 30 g of dietary fiber per day:**
 - Fruits, vegetables, whole grains, and dried beans are good sources of fiber:
 - Aim for 5 cups of fruits and vegetables per day.
 - Have 3 ounces (oz) of whole grain foods every day.
- **Plan to eat more plant-based meals, using beans and soy foods for protein.**
- **Talk with your dietitian or doctor about what a healthy weight is for you.** Set goals to reach and maintain that weight.
- **Talk with your health care team to find out what types of physical activity are best for you.** Set a plan to get about 30 minutes of exercise on most days.
