

# NCC Pediatrics Continuity Clinic Curriculum: General Pediatrics Scavenger Hunt

## PART 1 (Complete Part 1 over lunch)

You are a single active duty E3. You have one 4 year old child and are pregnant with your second. You gave away all your infant stuff after the first one because you didn't think you would need it any more.

You make \$2,161.60 a month base pay, \$2355.00 BAH and \$406.98 BAS for a total monthly income of \$4923.58. You pay \$499 a month for child care on base, about to increase to \$923.15/month (15% multiple child reduction.) You pay \$1900/month for a one bedroom apartment and \$167/month for utilities. You have a monthly payment of \$318 a month to lease your Toyota Corolla. That leaves you approximately \$1600 monthly for all other expenses.

What purchases for your newborn are essential right now? Here is one [suggested list](#). What is missing? Would you remove anything?

What are other options/avenues for obtaining equipment/baby paraphernalia?

What else do you think she should budget for after the newborn period?

# NCC Pediatrics Continuity Clinic Curriculum: General Pediatrics Scavenger Hunt Part 2 (After Lunch)

Instructions: Go to [Buy Buy Baby in Rockville](#) . Your group may work together or split up. Take NO MORE than 45 minutes to try and complete all the questions. Record the cost of the item you would buy in each category. **COST**
